Office Action Summary

Art Unit: 3764

### **DETAILED ACTION**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-30, 33 and 41-42 are, drawn to a female condom, classified in class 128, subclass 830.
- II. Claims 31-32 and 36-40, drawn to a method of maintaining a condom within a vagina and an assembly for preplacing a female condom, classified in class 128, subclass 898.

Inventions Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions Group I can be used without using Group II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
